The link building method and other useful information revealed in this eBook have worked for me. However there are many criteria which search engines take into account before ranking a webpage. The factors that decide a ranking of particular page includes age of the website, content of the website, existing competition of the targeted keywords, html coding, design and many other things. If all things are in its place I do not see any reason why a particular webpage should not come up in search engine results. Gehnabazaar and www.seosoftware-reviews.com do not guarantee or make any representation or warranties with respect to the accuracy, applicability, fitness or completeness of the contents of this method.

“Get 30 BackLinks In 30 Days”

Welcome to Get 30 Backlinks in 3 days Program. First I would like to thank you for downloading this amazing eBook. The information that I am going to disclose to you now have changed my entire link building campaign. And I know how it can be frustrating to work on building links and waiting to see when our keywords climb the google search engine ladder. (I have waited for almost 3 years to get to this point now.) You got to have patience and money. And if you lose either one of them, you are out of race.

Well the time has come. Wait no more! What I am going to unfold to you is a very amazing and secret technique that can get you backlinks from high PR websites. If you feel this technique wont work or you feel what the crap! etc, I`ll give you a simple suggestion. Check you keyword rankings, make a note of it. Try this method for atleast 3 months. And then check it after 3 months. If you think you are not getting any results then just chuck it. But just imagine what if your keywords get ranked to 1st page within 15 days ???? You got nothing to lose. You are building links anyways. Lets not waste more time on introduction. Coming to the point.....**Heres the SECRET!**

I would be giving you links of high PR sites (usually above Pr 4-5) with specific sets of instructions on how to register, where to go, what html code to create etc. Within 5 min you should be able to register and create a link on the site (with your anchor text). You can, if you want, register in different email ids and repeat the procedure a couple of times with different set of keywords.

Link building code that you would require.

HTML Set Up:

```
<a href="http://www.yourdomain.com">Your Keywords</a>
```

BBCode Set Up:

```
[url=http://www.yourdomain.com]Your Keywords[/url]
```

Important Notes

- 1) The links that come from the below links are all do-follow.
- 2) While using this strategy of link building, you might notice a sudden fall or rise in the rankings of your keywords for some days. This is quite normal and one should not get panicked by the same. It is called as the google dance. Eventually your rankings would get stabilized in a week or two.
- 3) If you have any other questions, please do not hesitate to ask me at contact@gehnabazaar.com. I will help you in whatever way I can.
- 4) I have found these two tools very useful in automating my registration process and logging in process. These tools help you to fill up forms and store password with just one click (Please read more on their websites). If you are new to website building industry I strongly suggest to use these tools (or any other similar type tool). You might not realize the importance of it now, but shall surely realize after 2 years. The faster you work, the faster you can build links.
 - 1) [Roboform](#) (windows users) and
 - 2) 1password (Mac users)
- 4) Do not leave more than 3 or 4 links on each site. You might get tempted to do so, but you would surely get banned from the site later on. This can nullify all your link building efforts.
- 5) I have included a bonus page at the end of the Ebook. This contain many tools and softwares that you might be interested in. Please do not forget to read that later.

Lets Start Building Links!!

The Website Links Guide with instructions.

1) <http://forum.toribash.com/>

Unlike other newsletter which sends only junk affiliate links, this newsletter gives you real updates about seo and google ranking news. A must read for serious webmaster

Outsource Your Work and Get Faster Output

Have you ever thought of outsourcing your work and saving time. When I started as a webmaster I never knew that one could outsource their work. I was always worried on where to find a reliable programmer and how to trust some one and to know if he s charging the right amount.

You need not worry anymore !

If you have any kind of work just post your project for FREE on any of the below sites and get professional bid for your work. You can post any type of work from writing an article, creating a website, social bookmarking, posting comments, creating a software etc. Anything you can think of. Posting of any project is absolutely free. At least you`ll get an idea on how much it would cost for your work to be done.

The best sites in the industry for outsourcing are -

- 1) [Rent a coder.com](http://rentacoder.com)
- 2) [Scriptlance.com](http://scriptlance.com)

If you require any assistance in posting your project on the above sites, please do not hesitate to mail me at contact@gehnabazaar.com and I shall help you wherever possible.
